- d. BIG floorcoverings NV, Rijksweg 442 Wielsbeke, Belgium
Tel: +386(3)7120847
Email: matjaz.prislan@bintg.com

(2) Written motivation:

- a. The results in part (3) concludes that all tested products complies with the emission class A+ according to French regulation and AgBB test scheme for VOC emission according to German regulation, therefor are products also with threshold values according to annex 2 of the Belgium Royal Decree on emissions.
- b. Nevertheless that products can be manufactured in production site in Belgium or Slovenia, product groups listed in the Product Emission Dossier have same construction and same raw materials (except reinforcement which have no effect on VOC emissions). According to CPR 305/2011, article 36 b, test results are in this manner representative for all products in the product groups.
- c. All products manufactured in Belgium and Slovenia are within threshold values for the emission class A+ according to French regulation and AgBB test scheme for VOC emission according to German regulation. Therefore products comply also with Belgium Royal Decree on emissions.
- d. BIG floorcoverings NV and Juteks d.o.o. are manufacturing according to ISO 9 001 and harmonized standard EN 14041 (system 3) and maintain quality assured production. Full traceability enables BIG floorcoverings NV and Juteks d.o.o. to act accordingly.

(3) Specific documentation:

According to test reports no. 67533, 67723, 67732, 64278, 64856, 69627 from Öti institute representative products comply French A+ emission class and AgBB test requirements for VOC emissions Floor Coverings meet the threshold values for according to annex 2 in the Belgium Decree on emission
